

DINOLE®

VELLUTO

ISO 14001:2015. ENVIRONMENTAL MANAGEMENT SYSTEMS.

By obtaining the international ISO 14001:2015 certification, DINOLE® strengthens its commitment to preserving the environment for future generations.

The ISO 14001 standard establishes the general requirements of an environmental management system. This standard is based on humanity's concern for sustainable development of the planet.

The standard focuses on enabling organizations to identify, monitor and manage the environmental impacts of their activities, reducing them within the limit values thanks to maintaining and constantly improving the implementation of the Environmental Management System.

Through annual maintenance audits, the responsibilities, discipline and traceability of company operations are verified to confirm and certify the effective environmental commitment of a company.

DINOLE® increases company performance through the Operational Environmental Management System:

- Improved control of consumption of raw materials, energy and waste management.
- Compliance with environmental regulations and requirements.
- Minimization of the risk of environmental accidents.
- Standardization of the rules for the various operations, which, in this way, are documented, made known and understandable to all company personnel.
- Creation of an effective self-monitoring and self-improvement mechanism through internal audits.
- Refinement and continuous development of the Environmental Management System to increase the overall improvement of the company performance.
